

European Patients' Rights & Cross-Border Healthcare

Member of the European Parliament Interest Group

MEP Brando Benifei
(Italy), S&D

"As an MEP, it is important to struggle for patients' rights and quality healthcare in order to grant every European citizen wellbeing and quality of life. Healthcare is nowadays of vital importance to achieve social justice, therefore Europe must stand on the front line, ready to address every issue that could result in an unjustified difference of treatment between citizens and between different EU countries."
